Introduction

This guide explains how to upgrade previous versions of Vodigi to Version 6.0. You can only upgrade from Version 5.0 and later.

Preparation

If you haven't done so already, you will need to download Vodigi Version 6.0. All the components of Version 6.0 are contained in a .ZIP file and can be downloaded from the following locations:

CodePlex: <http://vodigi.codeplex.com/releases>

SourceForge: <http://sourceforge.net/projects/vodigi/files/?source=navbar>

Download.com: http://download.cnet.com/Vodigi-Open-Source-Interactive-Digital-Signage/3000-2064_4-75695917.html?tag=mncol;1

Create the folder **C:\Vodigi**. Extract the contents of the .ZIP file to the folder.

Database Upgrades

To upgrade the Vodigi databases, follow these steps:

- Backup your Vodigi and VodigiLogs databases.
- Upgrade the Vodigi database as outlined below.

The database upgrade scripts can be found in the folder **C:\Vodigi\DatabaseScripts**.

If you are running any Vodigi version less than Version 5.5, you must upgrade the databases to Version 5.5 before you can upgrade to Version 6.0.

To update your databases from Version 5.0 or Version 5.1 to Version 5.5, run the following script:

Vodigi 5.0 to 5.5 - Survey-Music-SystemMessage Scripts.sql

To update your databases from Version 5.2 to Version 5.5, run the following script:

Vodigi 5.2 to 5.5 - Music-SystemMessage Scripts.sql

To update your databases from Version 5.5 to 6.0, run the following script:

Vodigi 5.5 to 6.0 - DB Upgrade Scripts.sql

Vodigi Administrator Upgrade

To upgrade the Vodigi Administrator, follow these general steps and be sure to perform the detailed instructions in the document '**Vodigi - Vodigi Administrator - Setup Guide - Windows Server 2012**' or '**Vodigi - Vodigi Administrator - Setup Guide - Windows Server 2008**'.

- Backup all the existing files in the Vodigi Administrator web site.
- Install Version 4.5 of the Microsoft .NET Framework if not already installed.
- Install Microsoft ASP.NET MVC 4 if not already installed.
- Remove all the files and folders in the root web application folder **EXCEPT**:
 - The **UploadedFiles** folder and its contents
 - The **Media** folder and its contents
- Install the new version
- Update the **web.config** file of the new version. Refer to the **web.config** file from your previous installation if necessary.

Vodigi Player Upgrade

You must upgrade all previous players to Version 6.0.

To upgrade the Vodigi Player:

- Note the player name and account name used to register the player
- Uninstall the existing player (or simply delete all player files)
- Setup the player as outlined in the document '**Vodigi - Vodigi Player - Device Configuration Guide - Windows 7**' or '**Vodigi - Vodigi Player - Device Configuration Guide - Windows 8**'.
- Register the player using the same player name and account name used to register the player previously.
