Introduction

The Vodigi Administrator is a web-based solution and must be installed on a web server. It is recommended that the web server use Windows Server 2008 or Windows Server 2012 as the operating system. Internet Information Services (IIS), which is included with Windows Server 2008 and Windows Server 2012, is recommended as the web server software to use with Vodigi.

This guide is intended to be used to assist in the installation of Internet Information Services in Windows Server 2012.

Prerequisites

It is recommended that the web server use Windows Server 2008 or Windows Server 2012 as the operating system. Installation instructions in this document assume Windows Server 2012 is the operating system.

Installation

When Windows Server 2012 is installed, most services are not installed or enabled by default. This is for security reasons, as no service should be running unless it going to be used.

Follow these steps to install and enable IIS on Windows Server 2012.

- Open **Server Manager**.
- Select Add **Roles and Features**.

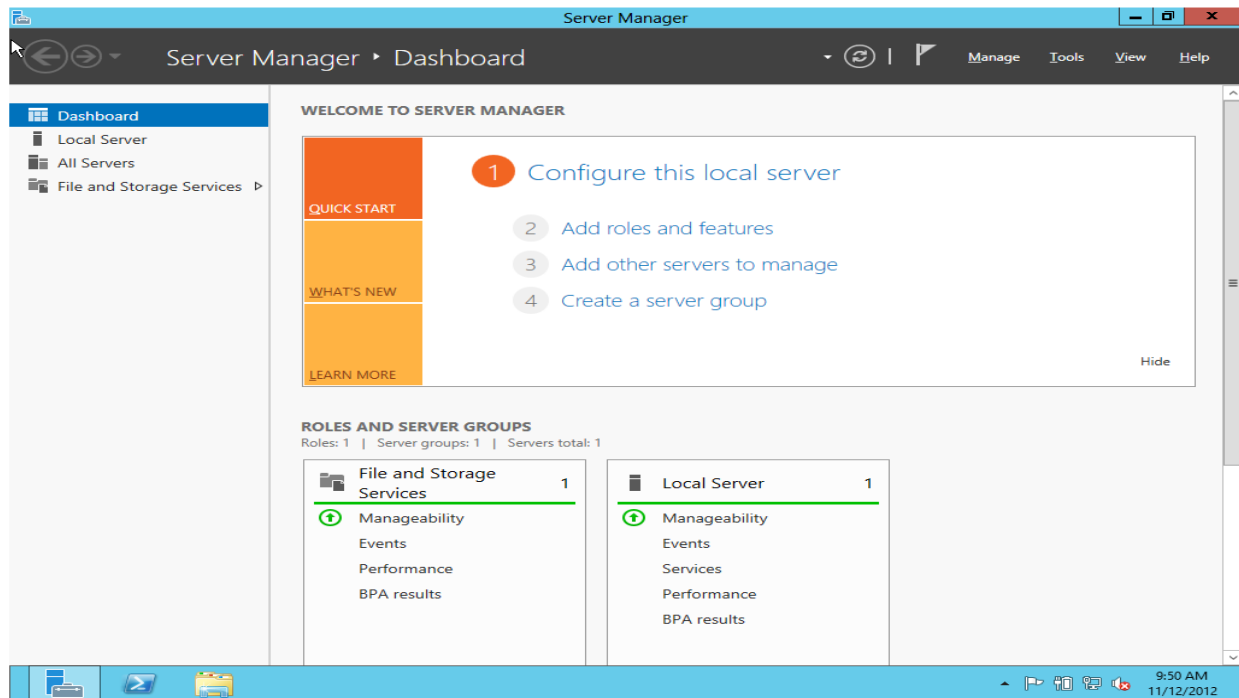

Figure 1 - Step 1

- The **Add Roles and Features Wizard** will be displayed.
- Click **Next**.

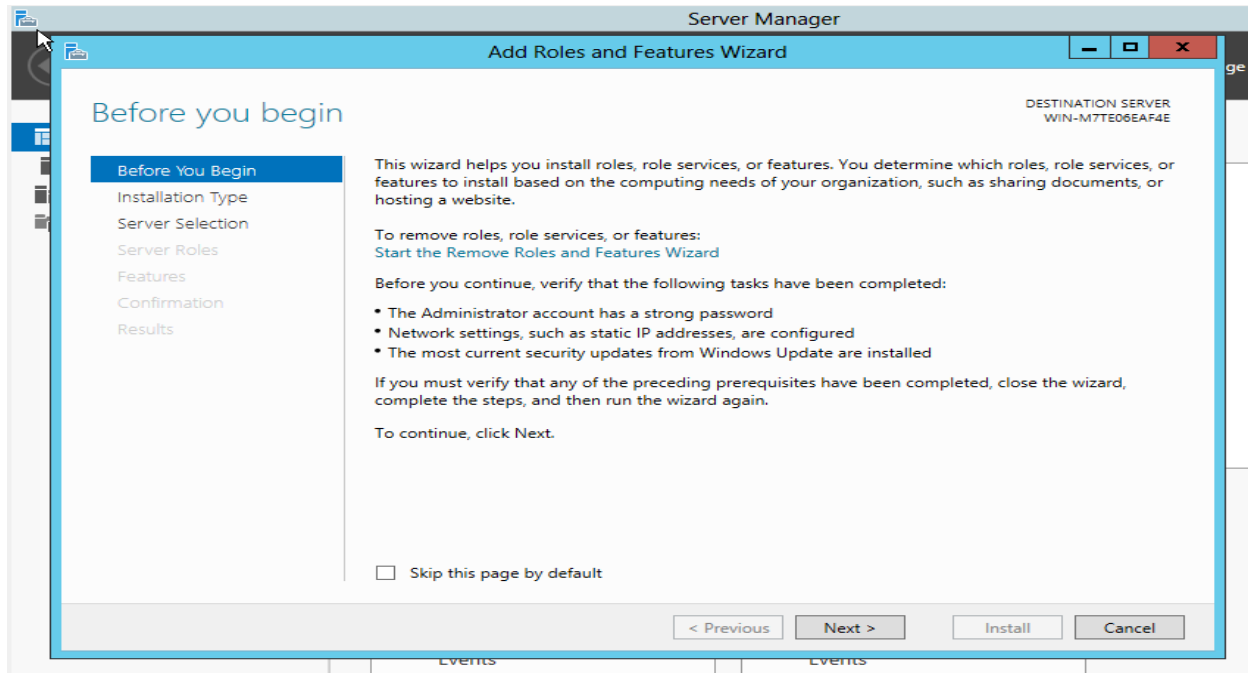

Figure 2 - Step 2

- Select **Role-based or feature-based installation**.
- Click **Next**.

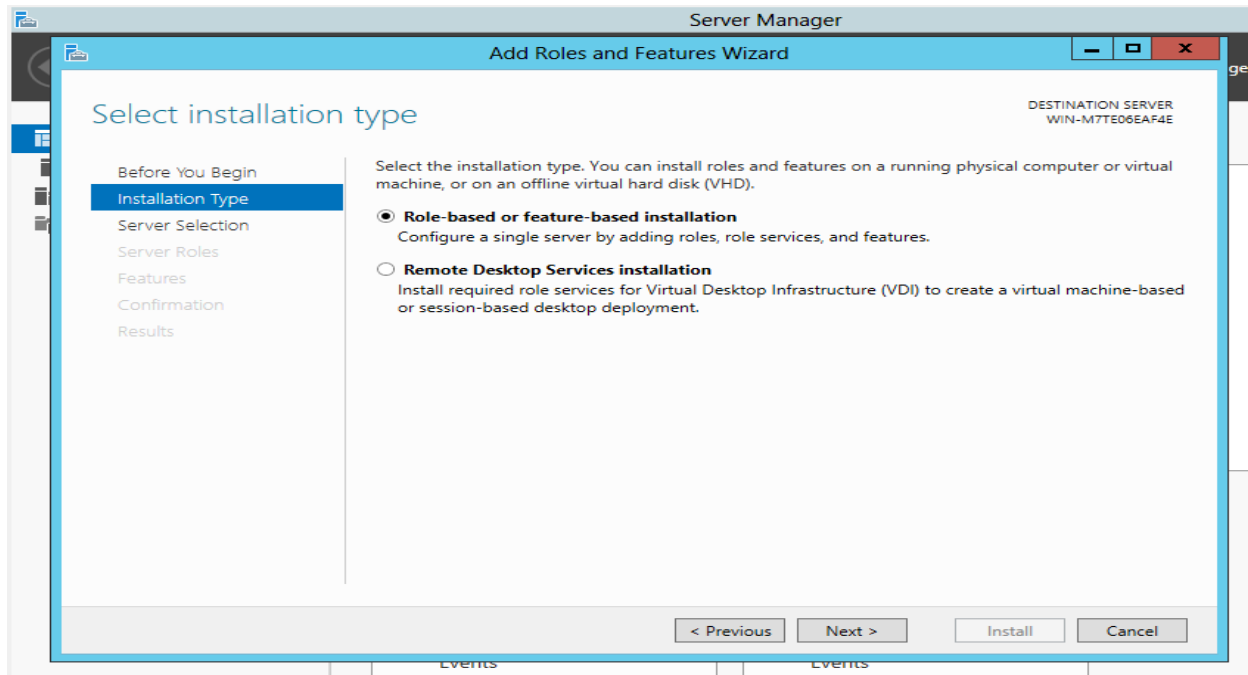

Figure 3 - Step 3

- Select the appropriate Windows Server 2012 server from the list of servers. Typically, there will only be one server in the list.
- Click **Next**.

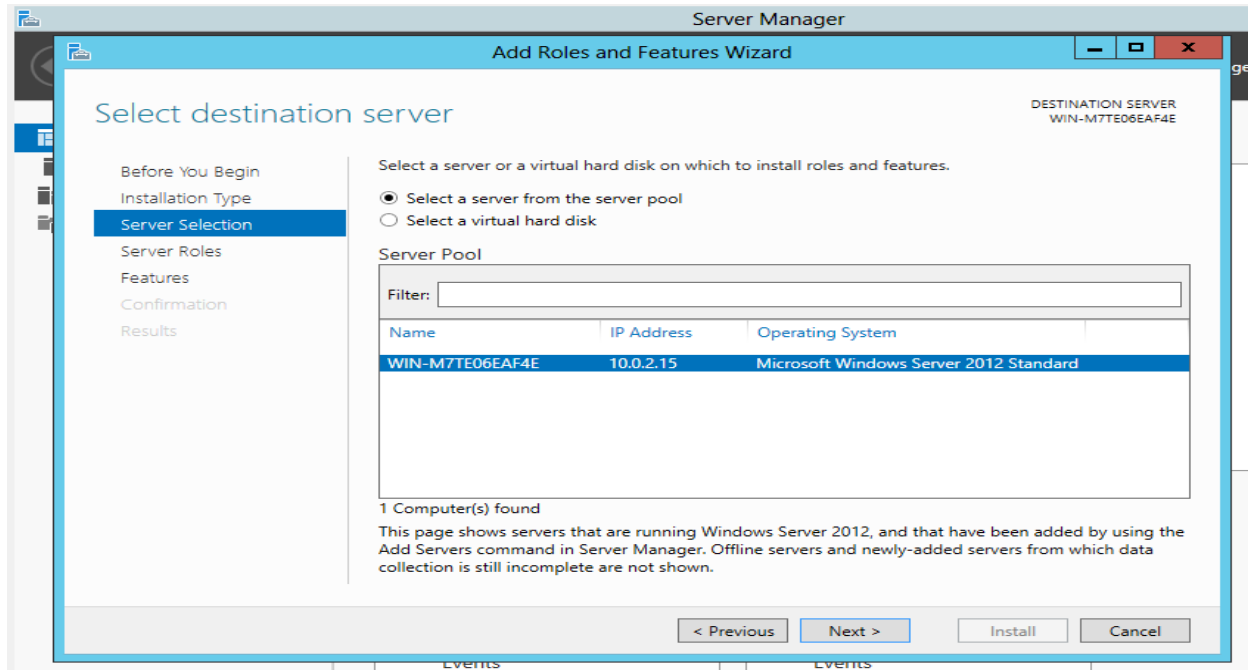

Figure 4 - Step 4

- Select the **Web Server (IIS)** role. You may be prompted that other roles or services will be selected. You should allow the associated roles and services to be installed.
- Click **Next**.

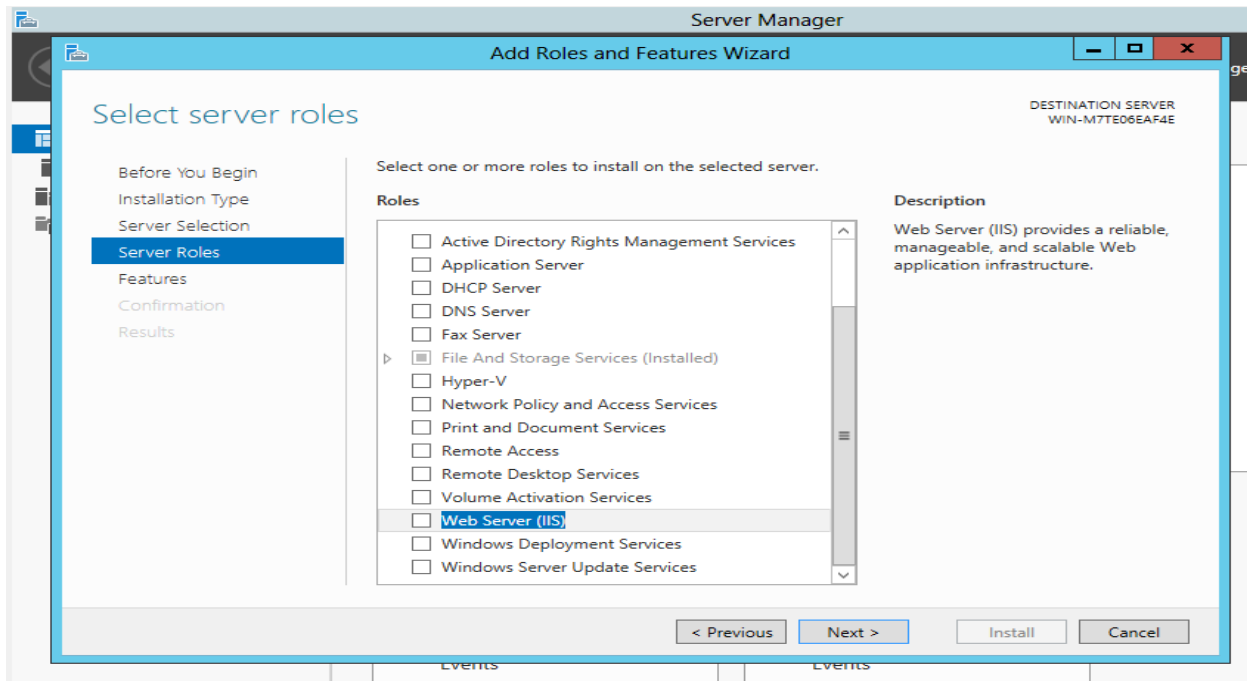

Figure 5 - Step 5

- Select any additional features you would like to add.
- You must expand the **.NET Framework 4.5 Features** node and select **ASP.NET 4.5**.
- If you are going to use the **Vodigi Media Uploader** to upload media, make sure you select the **FTP Server** feature.
- Click **Next**.

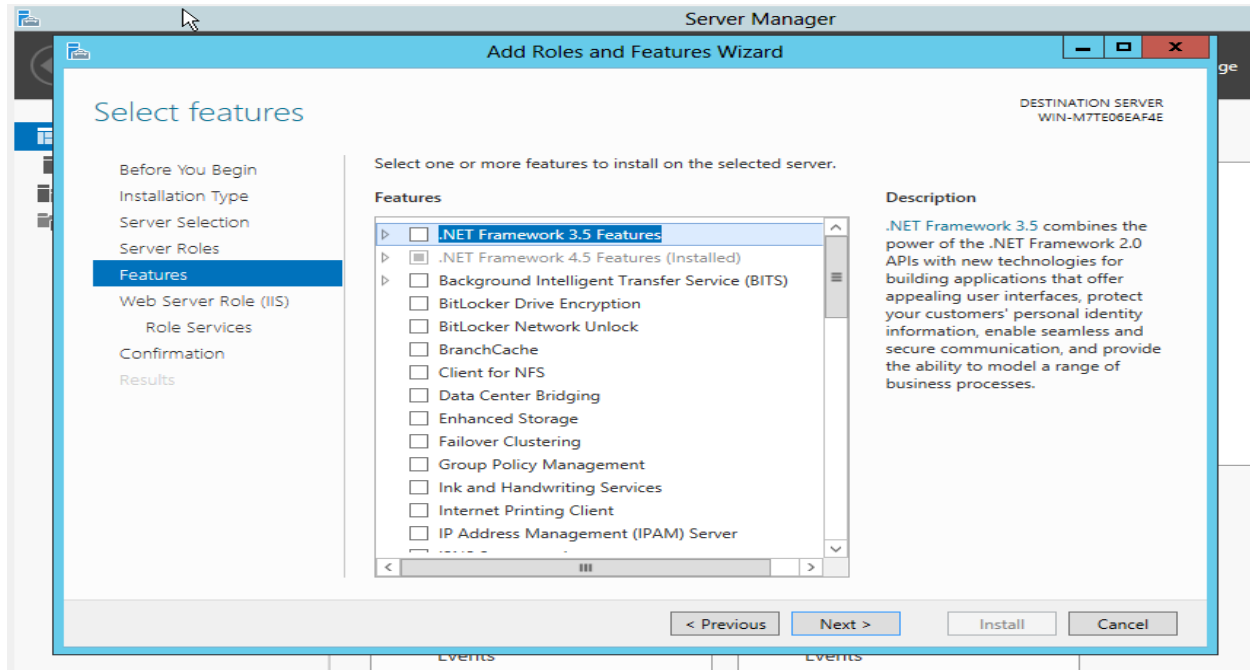

Figure 6 - Step 6

- Review the displayed information.
- Click **Next**.

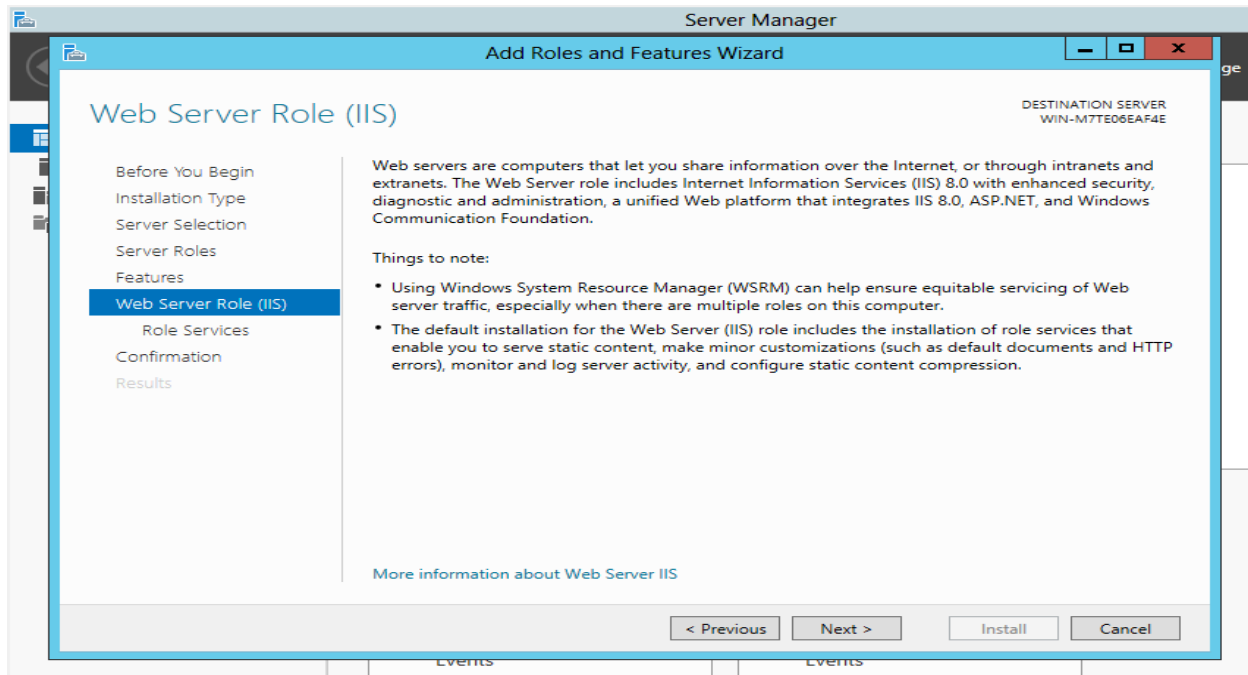

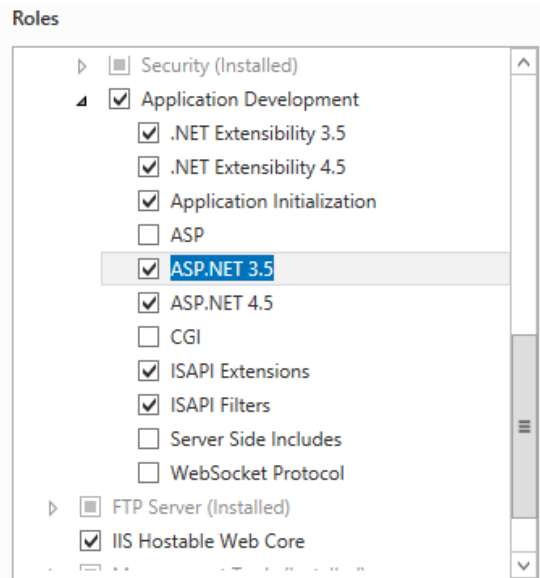

Figure 7 - Step 7

- Review the role services.
- Pay particular attention to the Application Development node. Select the options outlined in the figure below.

- Click **Next**.

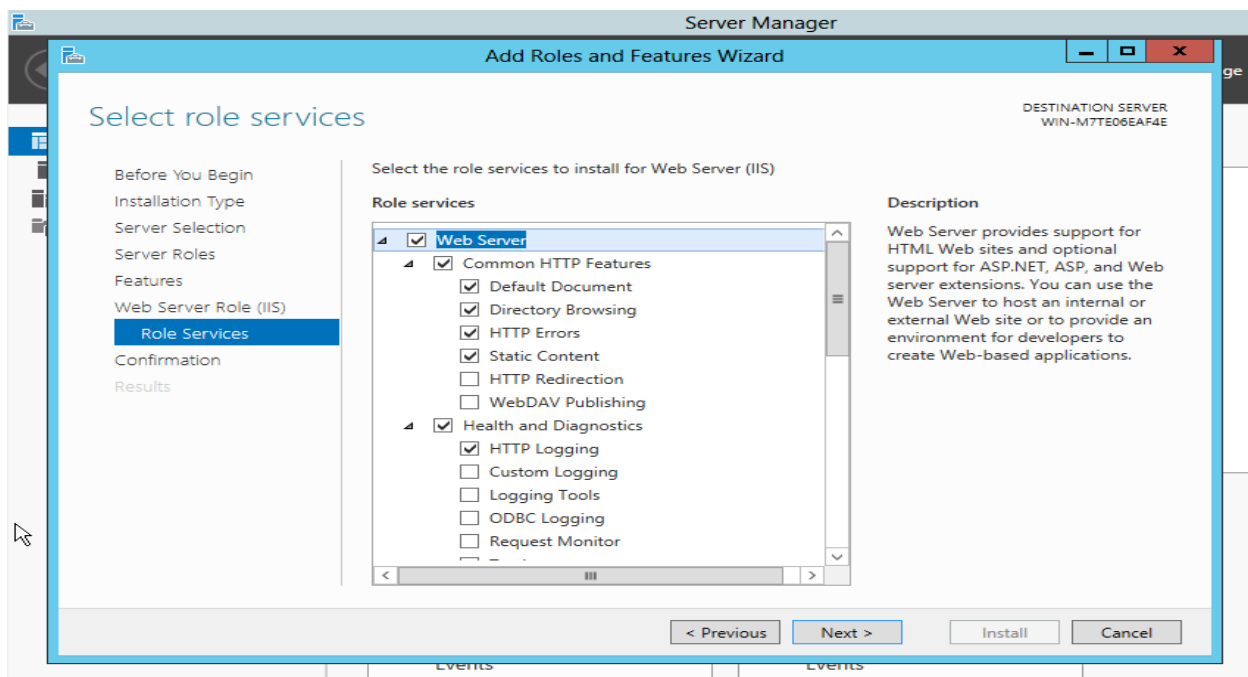

Figure 8 - Step 8

- Click **Install**.

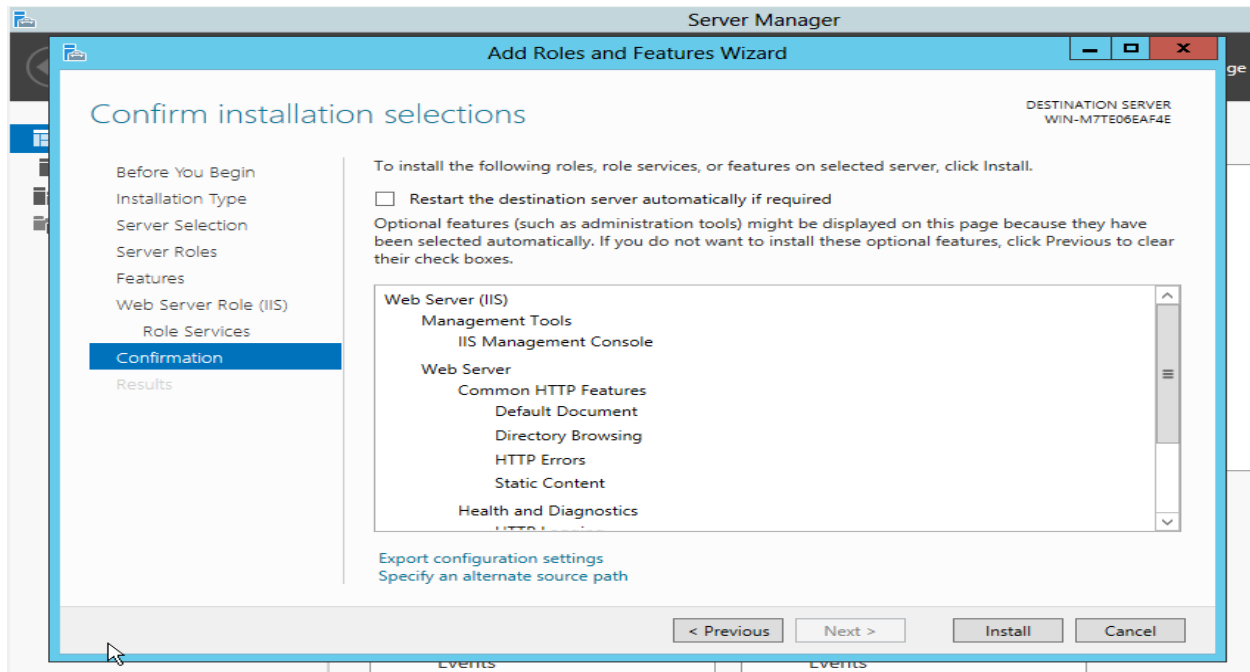

Figure 9 - Step 9

- Click **Close** once installation has completed.
